This is a talk about

code

culture

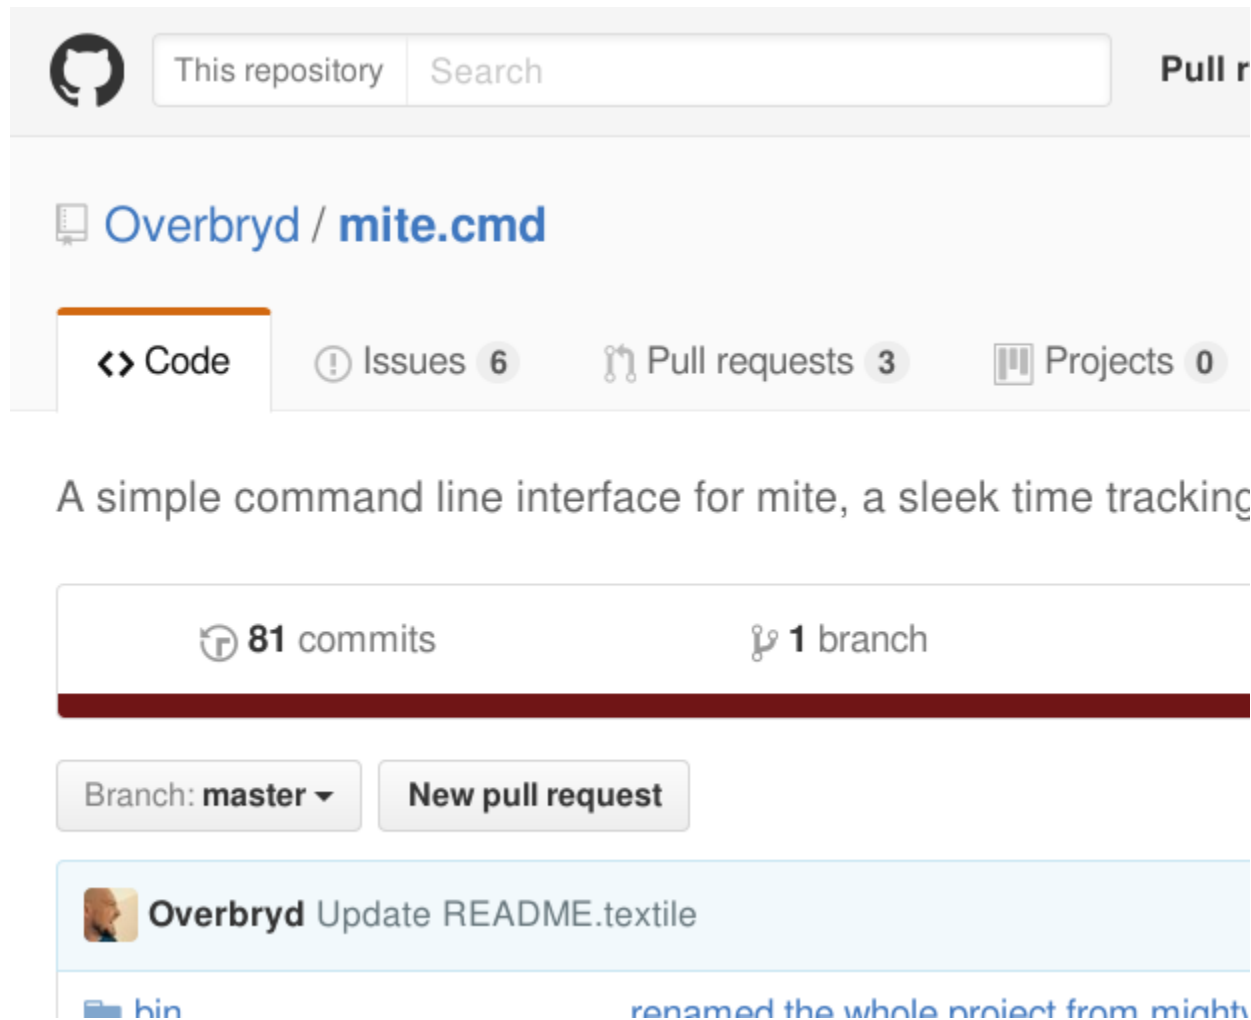

but most of all, it's about

YOU

It's about

THAT FEELING WHEN...

...you find just the GitHub repo

The screenshot shows the GitHub interface for the repository 'Overbryd / mite.cmd'. At the top, there is a search bar with the text 'This repository' and 'Search', and a 'Pull r' button. Below the repository name, there are tabs for 'Code', 'Issues 6', 'Pull requests 3', and 'Projects 0'. The 'Code' tab is selected. Below the tabs, there is a description: 'A simple command line interface for mite, a sleek time tracking'. Below the description, there is a bar showing '81 commits' and '1 branch'. Below this bar, there is a 'Branch: master' dropdown and a 'New pull request' button. At the bottom, there is a commit by 'Overbryd' titled 'Update README.textile' with a file named 'hin' and a description 'renamed the whole project from mighty'.

What does

VOX PUPULI

do about it?

I. BOOSTING THE PUPPET MODULE ECOSYSTEM

...for more fun with the Forge

II. VALUING CULTURE ABOVE CODE

There's plenty of nice folks.

They're just not as loud as the trolls.

III. BEING VIGILANT

We are prepared to enforce our CoC

SOUNDS FUN?

COME FOR THE CODE

Learning by doing? Sure!

STAY FOR THE COMMUNITY

There is always more work for additional maintainers.
